

1- The 95 x 95mm posts are made of painted galvanised steel, ensuring robustness and durability. The caps are made of injection moulded polyamide.

2- The plate is machined from non-slip polyethylene panels with a thickness of 12mm in which are embedded compact panels (HPL).
The non-slip polyethylene offers an excellent level of grip and performance over obstacles.
Robust in construction, the compact material (HPL) has excellent weather and vandal resistance properties.

3- The 16mm diameter rope is made of galvanised steel cable covered with polyester.

4- The cables are linked together and held in place by injected polyamide spheres.

5- The net fittings are made of polyamide. The fittings are composed of two distinct parts for ease of maintenance of individual strands.

6- The fixings are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
