

(technical specification)

J5908

1- **The 125mm diameter posts** are made of painted galvanised steel, ensuring robustness and durability. The caps are made of injection moulded polyamide.

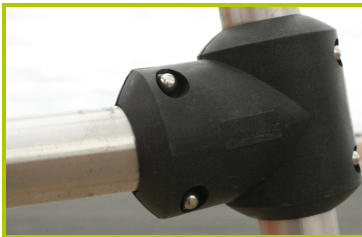

2- **The platform floors** are made from a 18mm thick, non-slip polyethylene material.

3- **The tubes** are made of 40mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

4- **Injection moulded polyamide fixings** connect the posts with the platforms and the various play features.

5- **Injection moulded polyamide fixings** connect the posts with the platforms and the various play features. They are non-toxic, flameproof and U.V. resistant. The thickness of the polyamide makes the equipment both strong and vandal resistant.

6- **The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
