

(technical specification)

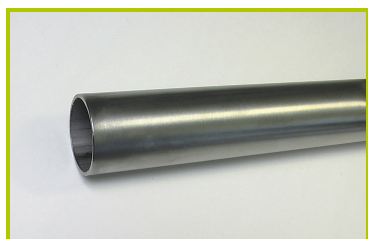

J5911

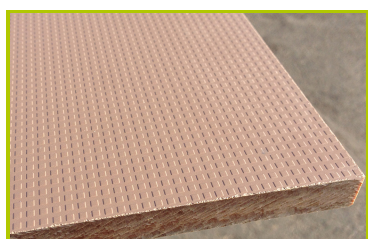

1- **The 125mm diameter posts** are made of painted galvanised steel. The grained finish has a slightly undulating surface for increased scratch resistance.

2- **The caps** are made of rotary moulded polyethylene (A) or injection moulded polyamide (B).

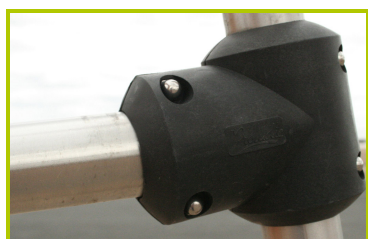

3- **The tubes** are made of 40mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

4- **The platforms** are made from a 12.5mm thick textured and non-slip compact material (HPL).

5- **The footrests** are made of shock-absorbing rubber with non-slip surfaces.

6- **Injection moulded polyamide fixings** connect the posts with the platforms and the various play features. They are non-toxic, flameproof and U.V. resistant. The thickness of the polyamide makes the equipment both strong and vandal resistant.

7- **The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
