

ACTI'Fit

(technical specification)

J37106

1- **The 102mm diameter posts** are made of painted galvanised steel. The two-tone grey grained finish has a slightly undulating surface for increased scratch resistance.

2- **The caps** are made of painted aluminium (A) or rotary moulded polyethylene (B).

3- **The tubes** are made of 40mm and 33mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

4- **The tubes used for the Parallel bars and Suspension bars** are made of electro-galvanized steel (diameter 34 mm) and stainless steel (diameter 40 mm), coated with epoxy paint. Electrogalvanization ensures corrosion resistance and provides a high quality finish. Stainless steel guarantees the longevity and robustness of the equipment over time.
The epoxy paint ensures better grip.

5- **The fixing collars** are made of painted aluminium.

6- **The coloured panels** are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

7- **The Central Column seating** is supported by a painted galvanized steel frame structure.

8- **The Rowing machine seat** is made of rubber. The handles are made of PVC.

9- **The smartphone holder** is made of polyamide for its strength and rigidity.

10-**The Coat Hook** is made of polypropylene.

11-**The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
