

# ACTI'Fit

(technical specification)

J37110

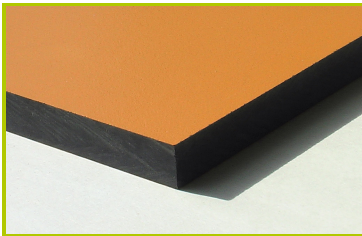

- 1- **The 102mm diameter post** is made of painted galvanised steel. The grained finish has a slightly undulating surface for increased scratch resistance. The cap is made of rotary moulded polyethylene.

- 2- **The fixing collars** are made of painted aluminium.

- 3- **The tubes** are made of 40mm and 33mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

- 4- **The coloured panels** are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

- 5- **The Central Column seating** is supported by a painted galvanized steel frame structure.

- 6- **The 70 x 70mm post** is made of painted galvanised steel, ensuring robustness and durability.

7- **The cap** is made of painted stainless steel.

8- **The polyurethane foam seats and backrests** ensure lasting comfort. Polyurethane foam is a resistant and shape memory material that helps to prevent overheating.

9- **The handles** are made of polyvinyl chloride.

10-**The shoulder supports** are made of rubber.

11-**The hydraulic** oil piston is made up of elements manufactured from chrome, aluminium and stainless steel. Users can adjust the resistance from just a few kilogrammes up to as much as 60kg on certain machines.

12-**The Punching ball** is made of polyurethane foam. The fixing system is made of stainless steel.

13-**The fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
