

Multi play structures (technical specification)

J49250

- 1- The posts with average diameter 120 to 140mm** are made from sap free robinia. The robinia is sanded and has had its bark removed. Robinia is naturally rot proof and does not require any additional chemical protection; it is equally extremely resistant to attacks from external sources (insects, fungi, climatic variations), guaranteeing the long term durability of the playground equipment.

- 2- The boards and half-logs** are made from natural robinia wood or Douglas fir (plank sizes: 22, 27 and 45mm; half-logs sizes: 80x40mm). Robinia wood and Douglas fir are naturally rot proof and do not require any additional chemical protection; they are equally extremely resistant to attacks from external sources (insects, fungi, climatic variations), guaranteeing the long term durability of the playground equipment.

- 3- The coloured panels** are made from a 13mm thick compact material (HPL). Robust in construction, it has excellent weather and vandal resistance properties.

- 4- The platforms** are made from a 12.5mm thick textured and non-slip compact material (HPL).

- 5- The tubes** are made of 40mm diameter stainless steel, guaranteeing lasting durability and reliability of the equipment.

- 6- The slide** is made of rotomoulded polyethylene.

7- The **chains** are made of stainless steel.

8- The **spheres** are made of polycarbonate sheets.

9- The **climbing holds** are made of polypropylene. They are non-toxic, inflammable and shock and UV resistant.

10-The **abacus spheres** are made of polycarbonate sheets.

11-The **telescope** is made of stainless steel.

12-The **fixings** are made of stainless or plated steel and protected by anti-vandalism polyamide caps.
